SUMMARY

Full-stack developer with 3+ years of experience designing, building, and delivering a production SaaS CRM used by 50+ contractors. Proficient across the entire stack, from database design and PL/SQL backend development to TypeScript-based frontends. Experienced in Agile environments, Docker-based workflows, and the full software development lifecycle.

EXPERIENCE

Software Developer

Mobiledash · Rexburg, ID · May 2024 – March 2026

- Led development of a full-stack Oracle APEX CRM supporting 50+ active contractor users, owning features across database, backend, and frontend layers.
- Designed and maintained a normalized Oracle database schema, writing complex PL/SQL procedures, triggers, and packages to support core business logic including invoicing, estimating, and contract management.
- Containerized the development environment with Docker, standardizing workflows and significantly reducing onboarding time for new team members.
- Collaborated in a 3-person team across the full product lifecycle — from requirements and architecture through deployment and user feedback.

Junior Software Developer

Mobiledash · Rexburg, ID · April 2023 – May 2024

- Built and maintained Angular/TypeScript applications delivering responsive, component-driven UIs consumed by field contractors on mobile and desktop.
- Established Jest unit test coverage for UI components, reducing regression risk and establishing a testing baseline for the team.
- Extended Oracle APEX application functionality with custom PL/SQL, JavaScript, and HTML integrations to meet evolving business requirements.

SKILLS
